

# FREE MAPS TO IMPROVE MAP USE SKILLS

## *MapAware MapPacks*

In support of the MapAware initiative, the Chief Directorate: National Geo-Spatial Information supplies five free maps to schools (GET and FET levels). To qualify for this donation schools must teach Geography as part of the GET - Human and Social Sciences and/or offer Geography as one of the optional subjects for FET. The aim is to put maps on the walls of every South African classroom where map use in geography must be taught. The MapPack contains the following maps and other useful mapping information:

<b>1: 2 000 000</b>	Wall Map of South Africa
<b>1:250 000 Topo-cadastral map</b>	A local map of your area depicting boundaries, farms, magisterial districts, provincial and international boundaries
<b>Provincial Map</b>	The relevant Provincial map corresponding to the position of your school. Displaying magisterial districts.
<b>1:50 000 Topographical map</b>	A local map of the area around your school, accurately depicting constructed and natural features using symbols, colour and elevation.
<b>1:10 000 Orthophoto map</b>	A local map with a photographic background – unfortunately the entire country is not covered by orthophoto (if available)

The maps are despatched free of charge to each qualifying school that responds to the offer and completes the details below.

### ***Only 1 MapPack may be supplied per school***

We need to find the right maps for your school and we want to establish a mailing list to inform you of what else we are doing to support education and promote map literacy. Please give both addresses. If your school does not have a street address please describe where your school is. Fill in the application form below, which must be stamped and signed by the school principal or senior geography teacher, and post it:
